

Electromechanical components

EXPERTS IN SWITCHGEAR CABINET EQUIPMENT

AIR-CONDITIONING, LIGHTING, ACCESSORIES.

[REDEFINING STANDARD]

[PRODUCTS]

Air-conditioning

Enclosure heaters

Enclosure dehumidifiers

Thermoelectric coolers

Compressor coolers

Filter fans & exhaust filters

Roof-mounted fans and air vents

Internal fans

19 inch fan units

Compact fans

Heat exchangers

Thermostats & controllers

Accessories

Lighting

LED lamps

LED enclosure lighting

Lamps for enclosures

Light fittings

Accessories

Document pockets

Plug sockets

Ground straps

[ELMEKO STANDS FOR]

We develop innovative products for cooling, heating and illuminating switchgear cabinets. Compatible accessories make for a comprehensive product range.

Quality

In the manufacture of our products, we attach great importance to the label “Made in Germany”. ISO 9001:2008 certification confirms the quality of our products, which are made using high-quality components from well-known manufacturers. No product leaves our premises untested. So you are guaranteed technology you can rely on and we have satisfied customers in every sector of the economy.

Flexibility

And if fast delivery is required, we are the perfect partner. Large stocks of standard items, swift realisation of customized solutions and short decision-making channels guarantee the flexibility needed to meet customer requirements. You are very welcome to put us to the test. Send us an inquiry for the products you need.

Partnership with customers

Close cooperation with customers is an important element of our business. That may seem obvious but it is not something you can expect everywhere today. At ELMEKO, you can. We identify with your needs and make meeting your requirements our mission. These are not just words; they are a pledge. **Put us to the test!**

[OUR EXPERTISE]

A switchgear cabinet protects the electrical control or DP systems inside it. To ensure that those highly sensitive systems work safely and reliably, the cabinet needs to meet ever more exacting requirements.

Air-conditioning and lighting are becoming particularly important here. ELMEKO has the know-how needed to develop and manufacture the components required.

Air-conditioning

Every switchgear cabinet has particular air-conditioning requirements. They depend on its size and design and on the equipment it accommodates. But ambient temperatures and humidity are also relevant; so are installation situation and exposure to sunlight.

A dirty environment requires an enclosure and cooling system with a high degree of ingress protection.

With teams drawing on decades of experience, ELMEKO develops and manufactures components such as coolers and heaters that take account of every relevant factor.

Lighting

To create a suitable working environment for customers and service engineers, it is important to provide very good lighting for the inside of a switchgear cabinet. Lights need to work reliably; they are essential for the electrician called to fix a system fault or failure. We manufacture high-voltage LED switchgear cabinet lights that offer brightness, robustness and longevity for industrial applications.

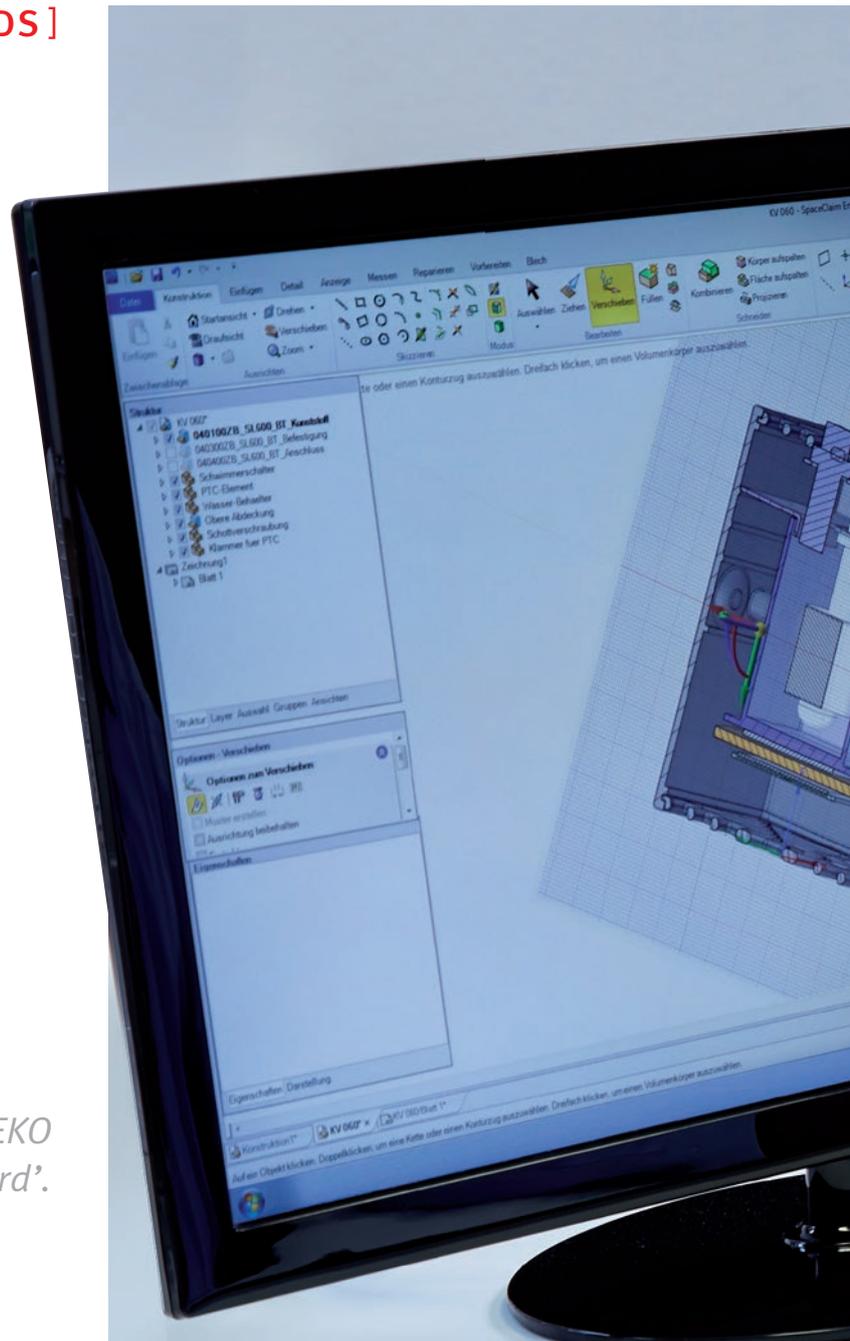

Accessories

Document pockets, ground straps and plug sockets are just a few of the practical accessories available for switchgear cabinets. This is another area in which we regularly break new ground with innovative products. Our digital document pocket, for example, permits circuit diagrams and other important documents to be stored in paperless form. We are sure to have the right products for your cabinet. If not, give us a call or drop us a line. Customized solutions can be realized swiftly at any time.

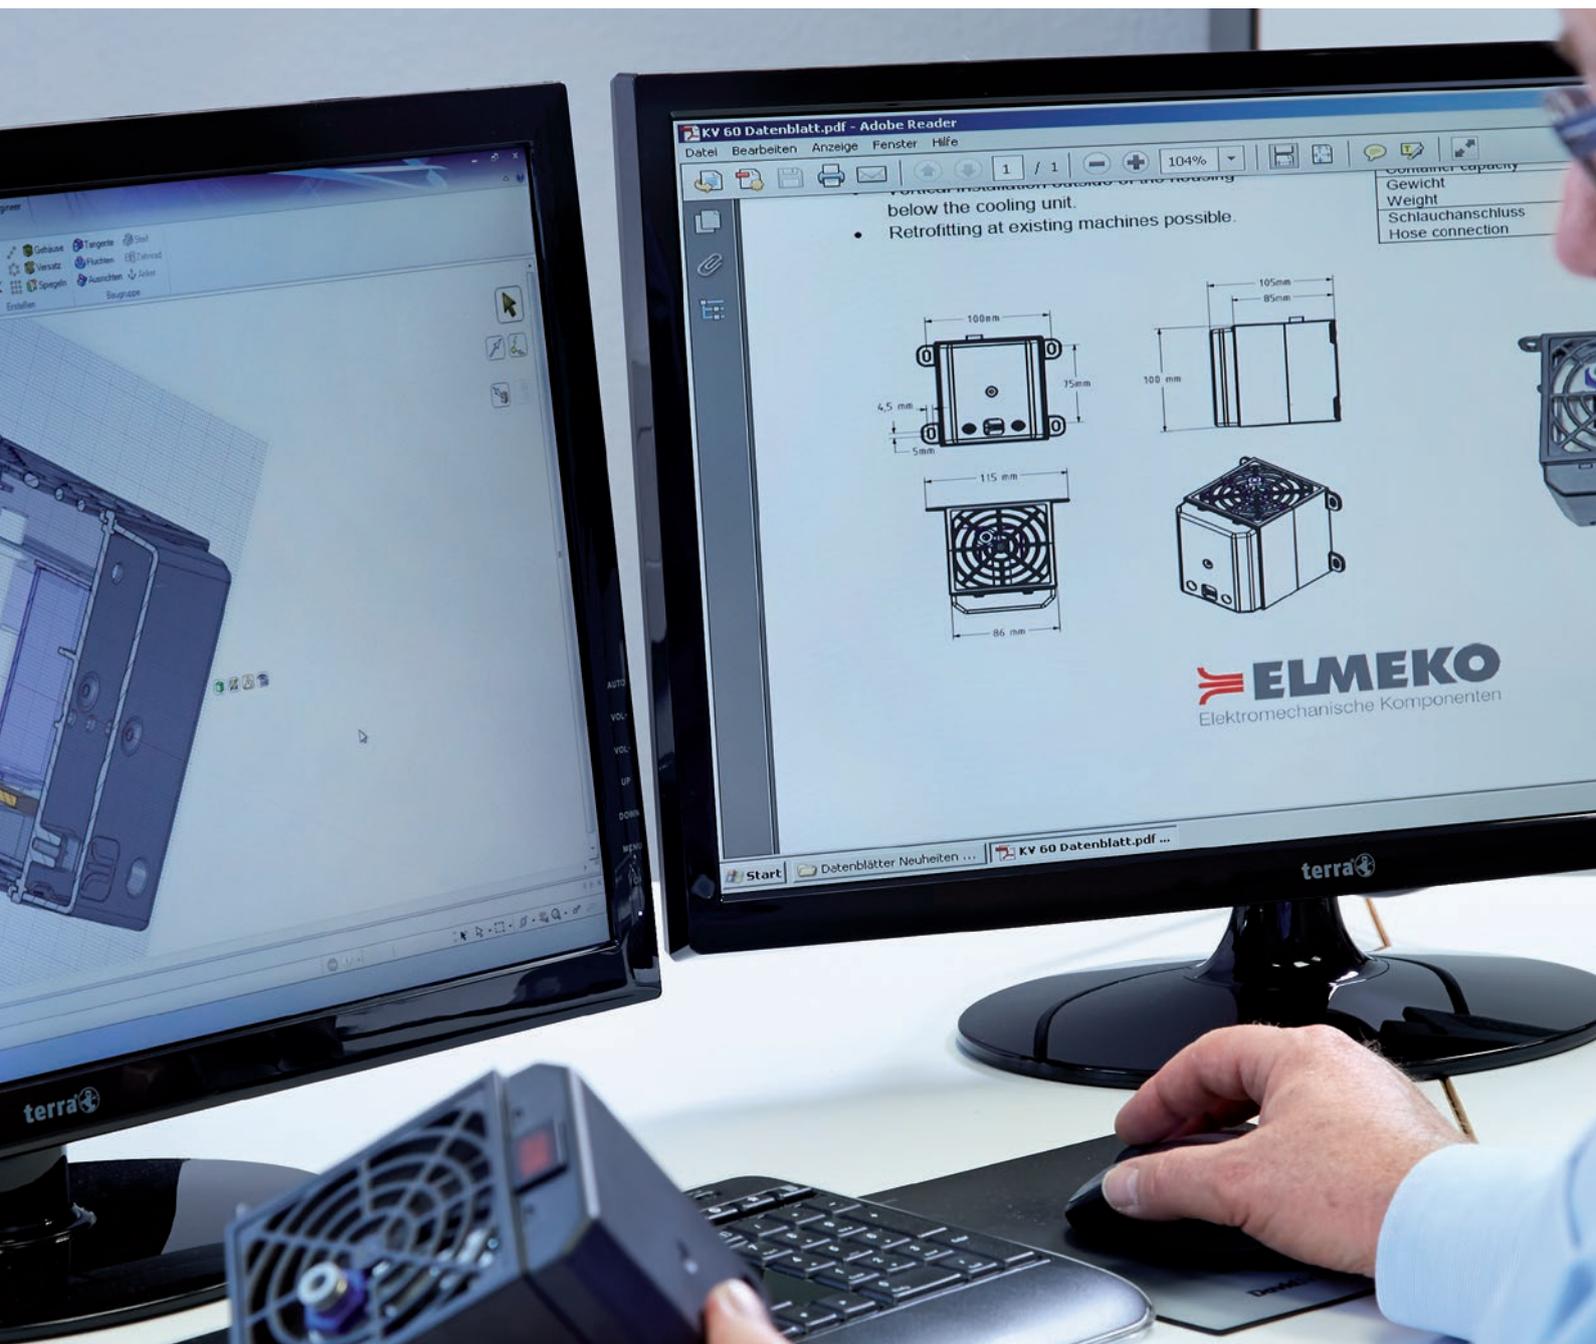

[A QUESTION OF STANDARDS]

“ ELMEKO
redefines ‘standard’.

As a developer of high-quality switchgear cabinet components, we attach particular importance to maintaining a stream of products with innovative features. At ELMEKO, ‘standard’ is regularly redefined.

We are also happy to provide project planning support and tailor components to your specific requirements. At ELMEKO, customer consultation, product development and fabrication are

so closely interlinked that it is always possible to find a solution that is optimal for the customer. Profit from our years of experience in switchgear cabinet components.

[FROM CUSTOMER REQUEST TO SERIES PRODUCTION]

Talks with the customer to establish the product specifications required

Technical concept for implementing the product solution, consultation with the customer

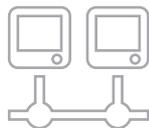

Prototype development, consultation with the customer

“ We work methodically, professionally and with transparency for the customer to develop and manufacture products tailored to the customer’s needs. That is an extremely effective approach, as experience has shown time and again.

Prototype optimisation,
preparation for series
production

Production of the
required product

[OUR ADVANTAGES]

- High-quality innovative products
- High availability, short delivery times
- Professional team with decades of experience

- Close cooperation with customers
- Realization of customized solutions
- Short decision-making channels for swift implementation
